

Dragon® NaturallySpeaking® Medical

Speech Enable Your EMR with the Most Advanced
Medical Speech Recognition Software

Dragon® NaturallySpeaking® Medical 9 – Accelerates the Adoption of Your EMR System

CHALLENGE:

How can we make our EMR system easier for clinicians to use?

SOLUTION:

By using Dragon NaturallySpeaking Medical software, clinicians eliminate all the typing and mouse clicks that can make using EMRs a hassle.

Dragon NaturallySpeaking Medical 9, the most widely used speech recognition system in medicine today, lets physicians navigate any Windows®- or Citrix®-based EMR system using voice commands to navigate, dictate progress notes, e-prescribe medication and access test results. By eliminating click-intensive navigation through menus, physicians readily embrace EMR systems, dramatically accelerating EMR adoption across a health system.

Dragon NaturallySpeaking Medical is up to 99% accurate “out-of-the-box,” and includes specialized medical vocabulary for more than 60 specialties and subspecialties. It allows physicians to dictate transcription-free notes via “once and done” dictation, dramatically reducing the time physicians spend documenting care.

Whether or not your organization has embraced an EMR system, Dragon NaturallySpeaking Medical is the right Windows-based dictation solution for clinicians.

Key Benefits

- Makes EMRs fast and easy to use
- Reduces time spent documenting care
- Raises clinician satisfaction
- Improves quality of patient documentation
- Lets physicians document in their own words
- Maximizes reimbursement per encounter
- Accelerates EMR return on investment
- Reduces or eliminates transcription cost
- Creates more legally-defensible record

Key Features

- Speech-enabled Windows-based EMR systems
- Variety of dictation input devices
- **NEW!** Dictaphone PowerMic® II user interface
- Multiple language models
- Flexible workflow options
- Shortcuts/templates
- Train word capability
- **NEW!** Network-wide speech profiles
- **NEW!** Bluetooth® support
- Voice macros
- Hands-free navigation
- Free text dictation within EMR

More Clinicians Use Dragon NaturallySpeaking Medical to Create Computer Based Medical Records than All EMR Systems Combined

Over 50,000 clinicians today use Dragon NaturallySpeaking Medical to dictate findings into EMR systems or in Microsoft Word®, making it the most widely used speech recognition solution in the healthcare industry.

Clinicians who use Dragon NaturallySpeaking Medical report that it makes them more efficient because it makes their EMRs easier to use. It's not surprising that Dragon NaturallySpeaking Medical has helped thousands of hospitals and group practices significantly increase their EMR adoption.

Dragon NaturallySpeaking Medical Release 9 Offers Greater Accuracy for EMR Use

Dragon NaturallySpeaking Medical 9 is Dictaphone's newest release, powered by **Dragon® Speech Technology**, the engine which powers all Dictaphone solutions.

Dragon NaturallySpeaking Medical 9's out-of-the-box accuracy is 30% higher than Dragon NaturallySpeaking Medical 8.

After a brief training session Dragon adapts to each user's speech; from then on it learns and becomes increasingly accurate with each use.

Dragon NaturallySpeaking Medical is designed to be compatible with all Windows applications and most Windows-based EMR systems. The program is fully network compatible, Microsoft® Vista compatible, and can be deployed on a Citrix network as well.

Speech Macros Reduce Time Spent on Documentation

With Dragon NaturallySpeaking Medical, clinicians use speech-driven macros to navigate the EMR system and to select from drop-down menus within the EMR's data fields, speeding up structured input. These macros voice-enable EMR functions, combine multiple mouse clicks in a single voice command, and allow hands-free navigation to any EMR screen or section. It also allows physicians to dictate additional findings in their own words using free-text dictation when necessary.

As a result, Dragon dramatically improves physician productivity without compromising the depth of description that only free text dictation can supply.

“I use Dragon NaturallySpeaking daily to perform all of my medical documentation, including chart notes, telephone messaging, staff messaging and order commenting... We see a significant workflow efficiency advantage when a physician can document directly into our EpicCare® EMR. This can reduce the number of ‘mouse-clicks’ needed to complete a process or navigate to a particular section of the EMR.”

Dragon NaturallySpeaking Medical offers a full range of capabilities.

- **Speech Enable your EMR.** Dragon NaturallySpeaking Medical is designed to work with virtually any Windows-based system.
- **Accelerated Clinical Documentation.** Most people speak over 120 words per minute, but type less than 40 words per minute. Dragon NaturallySpeaking Medical lets you create letters, reports and e-mails about three times faster than typing by hand. Voice commands can be created to instantly build and format templates for medical documents.
- **Ready to Use, Out-of-the-Box with 99% Accuracy.**
- **Shortcuts.** Custom command capability enables creation of personalized voice commands that instantly enter standard phrases or paragraphs, such as normal exam results.
- **Add/Train Word.** The system has the ability to add site names, new medications, and train system to recognize words that are difficult to understand for a particular user.
- **Ease-of-Use.** No script reading is required to get started. Dragon NaturallySpeaking Medical includes a full set of on-screen tutorials.
- **Multiple Language Models.** Dragon NaturallySpeaking Medical 9 includes a full library of 14 medical specialty

vocabularies covering over 60 specialties, including Cardiology, Emergency Medicine, General Medicine, Mental Health, Neurology, Ob/Gyn, Oncology, Orthopedics, Pathology, Pediatrics, Radiology, Surgery and others.

- **Supports Variety of Dictation Input Devices.** Dragon NaturallySpeaking allows providers to utilize multiple input options, including handheld digital recorders, PDAs and Nuance-approved Bluetooth headsets. Dictate into any Nuance-certified handheld device for automatic transcription when you synch with your PC. The Auto-Transcribe folder enables digital dictations from a handheld device to be transcribed automatically to streamline the dictation workflow.
- **PowerMic User Interface.** Dictaphone's PowerMics are ergonomically designed handheld microphones, which filter ambient sounds, even in noisy environments such as Emergency Departments. The PowerMic includes a pointing device and offers mouse functionality.
- **Flexible Dictation Options.** Providers can either self-edit within the EMR or send voice recordings to transcriptionists to edit within the Correction Client application.
- **Anytime, Anywhere Access.** Dragon NaturallySpeaking Medical allows user profiles, vocabularies and commands to be accessed over the network.

Dictaphone Healthcare Solutions

- **Commissure RadPort™ for Radiology**—A secure, web-based decision support application for appropriate diagnostic image order entry that satisfies pre-certification requirements.
- **Commissure RadWhere™ for Radiology**—A data-driven, front-end structured speech recognition reporting application designed for multi-site workflow orchestration.
- **Commissure RadCube™ for Radiology**—A comprehensive, yet flexible, data warehouse for multidimensional business analysis and visualization.
- **Dragon® NaturallySpeaking® Medical**—A front-end real-time speech recognition program that works with virtually any Windows®-based EMR system for efficient report completion, and easy navigation and adoption of the EMR. 
- **Enterprise Workstation®**—A front-end browser-based solution that offers physicians flexible input and editing options, to reduce report turnaround time and the costs associated with transcription.
- **Enterprise Express® Products**—Dictation, transcription and back-end speech recognition solutions that offer some of the most sophisticated technology and advanced editing capabilities. EXSpeech® is a key option, which recognizes physicians' dictation and routes it to a transcriptionist for final editing.
- **iChart® Managed Services**—A flexible ASP solution that integrates world-class speech assisted transcription services and advanced speech recognition technology to meet each organization's unique document completion needs.
- **PowerScribe® for Radiology**—A web-based, front-end speech recognition solution that can help radiology departments significantly reduce report turnaround time and lower transcription costs by as much as 75%-100% a year.
- **PowerScribe® for Pathology**—A front-end web-enabled workstation designed with special pathology-specific features for efficient hands-free reporting—from gross description through electronic signature.
- **Vocada Veriphy™**—A critical test results management solution that enhances patient care, increases physician productivity, improves risk management and automates compliance.

Compatible with Windows-based EMRs

Dragon NaturallySpeaking Medical 9 is compatible with most popular EMR systems available today:

- ALLSCRIPTS™ TouchWorks™ Electronic Health Record (EHR)
- Cerner Millenium®
- eClinicalWorks™
- GE® Centricity
- Eclipsys Sunrise Clinical Manager™
- Epic EpicCare®
- Epic Hyperspace
- Misys® EMR
- NextGen® EMR
- Veterans Administration CPRS

If your EMR is not on this list, please contact your Dictaphone sales representative to find out whether Dragon NaturallySpeaking Medical 9 is compatible with your EMR.

About Dictaphone

Dictaphone Healthcare Solutions is a division of Nuance Communications, the world's leading provider of speech and imaging solutions. Today, Dictaphone provides the most comprehensive family of speech-driven clinical documentation solutions available anywhere. Our vision is to accelerate the adoption of EMR systems, helping providers maximize the return on their technology investments.

About EMRConsultant.com

EMRConsultant.com is a division of 1450, Inc, the world's largest distributor of Dragon NaturallySpeaking Medical speech recognition software. EMRConsultant.com specializes in integrating Dragon NaturallySpeaking Medical with Electronic Medical Record software programs, and providing recommendations to healthcare providers concerning their health information technology.
